

**HILLSTRIKE
SNOWTRIKE
REV-17**

THE HILLSTRIKE EVOLUTION

WHAT?

We dreamed of a concept, that would combine what we loved the most in mountain biking with the thrills we enjoyed in snow sports.

WE EXPERIMENTED

WE PROTOTYPED

WE FOUND OUR FORMULA

WE ESTABLISHED OUR PRODUCTION

WHY?

Because we were missing our bikes in the winter.

Because there are many people out there who do not ski but they feel they should do something fun during the winter. Because winter resorts are expanding their offers beyond classic skiing.

And we wanted something as universal as a bicycle; something that can be ridden by anyone at any age.

And after 2 years on the market we present the all
new REV-17 Hillstrike snowtrike...

REV-17

PARALLELOGRAM SYSTEM.

The rear parallelogram system offers the rider a unique feeling of carving while riding a bike.

FRONT SUSPENSION.

High end front suspension from RockShox is used to provide absorption of small bumps and big hits.

FRAME DESIGN.

Universal size for any user and developed for all types of ski lifts.

SAFETY LEASH.

The safety leash prevents the trike from fleeing down the mountain in the event of a fall.

PEDAL SYSTEM.

Our innovative pedal system offers a better grip while riding down the slope or jumping big jumps.

CUSTOM SKIS.

The custom wooden core skis are specifically designed for the use on our trike, and are enforced on critical points to prevent breaking.

TECHNICAL SPECIFICATIONS

HEIGHT	91 cm (35,8")
WIDTH	62 cm (24,4")
LENGTH	186 cm (73,2")
SEAT/CHAIRLIFT HOOK HEIGHT	51 cm (20,1")

DECAL COLOR OPTIONS

Apple green

Mint

Panther rose

Bright orange

Vivid red

WHY SHOULD ANYONE BUY IT?

Because the riding experience itself is unique;

Hillstrike merges the blast of riding a bike with the sensation of carving/gliding on snow.

Because it is safe and easy to use!

It will be the easiest transition you ever made from any sport. Anyone can ride it, but the progression is on you!

Because it enables a mind-blowing versatility of use.

To any level and anywhere.

It can be simply skidded down the local hill, carved in winter resorts, jumped in snowparks, shred in freshly powdered woods, staircase-jumped in snowy metropolis and the list goes on!

HOW IS THE SPORT PROGRESSING?

The popularity of the sport is growing every year. Satisfied customers are sending us photos of their riding from all around the world!

Our contribution:

We are establishing a growing base of rental shops and distributors all over the world.

We gathered young inspiring athletes and created the Hillstrike Pro-team. They are ambassadors of our product and on a mission to discover the opportunities this sport can offer.

In the 2016/17 winter season the Hillstrike Cup was launched! Anyone can join and compete in individual races. In the end the overall winner is crowned as the Hillstrike Cup champion. Events like this help to gather greater crowds, enabling to spread the word of the new sport even further, while riders have an opportunity to compare their skills and meet the Hillstrike community.

We are recognised for our effort in promoting our sport by leaders in sport sponsorship like Red Bull and Monster Energy.

We live and breathe the mountains and there is nothing more rewarding than connecting with like-minded people. For us it's just as exciting getting someone new into riding a snowtrike or helping crew take their riding to the next level as it is being out on the slopes ourselves.
